PREFACE

25X1C This Mission Coverage Index (MCI) lists items of
25X1C intelligence interest in China covered by aerial photographic
25X1C material from CHURCH DOOR Mission [REDACTED] 181, dated 6
October 1963 [REDACTED]
[REDACTED] Items in the compilation are arranged in three
sections:

Section I provides summary information for a) newly
identified targets, b) previously reported
targets which show a change, and c) all
targets showing order of battle information.

25X1C Section II provides a listing of those targets which re-
flect no change in facilities from previous
target description. The mission number
shown on the photo reference line (e.g.,
NAC [REDACTED] refers to the MCI which con-
tains the most adequate description of that
target. Military installations where no
order of battle can be determined are listed
under this section.

Section III provides a listing of those targets which
could be identified but not interpreted.

All three sections are arranged 1) by country, 2) within
a country by subject, 3) within a subject by WAC area, and
4) within a WAC area by coordinates reading from south to
north and from west to east.

For the convenience of the user, an index to all targets
has been included following Section III. Targets in the index
are listed 1) by country, and 2) alphabetically by place name
within each country. Column headings, photo reference data,
and symbols indicating conditions which affect the appearance
of the target on the photography are explained in the appendix.

The user of this MCI is cautioned that the scan of pho-
tography was accomplished in a relatively short time and
often without the aid of precise analytical and mensural
techniques commonly employed in detailed photographic
analysis. Consequently, although the information presented
herein is essentially accurate, it may be altered somewhat
by additional detailed analysis.

SECTION II

THIS SECTION PROVIDES A LISTING OF THOSE TARGETS WHICH REFLECT NO CHANGE IN FACILITIES FROM PREVIOUS TARGET DESCRIPTION. THE MISSION NUMBER SHOWN ON THE PHOTO REFERENCE LINE (E.G., NAC [REDACTED] REFERS TO THE MCI WHICH CONTAINS THE MOST ADEQUATE DESCRIPTION OF THAT TARGET. MILITARY INSTALLATIONS WHERE NO ORDER OF BATTLE CAN BE DETERMINED ARE LISTED UNDER THIS SECTION.

APPENDIX

EXPLANATION OF COLUMN HEADINGS AND PHOTO REFERENCES

COLUMN HEADINGS

City, Installation -- This column contains the name of the city or town nearest the installation, followed by the name of the installation. If the name of the installation is not known, it is titled according to its function. Where appropriate, the city and installation names are followed by a capsule description.

Coordinates -- Coordinates are referenced to the SW corner of the minute square. When the subject installation covers a wide area, coordinates are given for the approximate center of the installation.

WAC -- This column provides the World Aeronautical Chart number for the area in which the subject installation is situated.

Installation Numbers -- This column is divided into two subcolumns. The first subcolumn lists, when known, the BE installation number assigned to the installation. The second subcolumn lists the installation number assigned by NPIC. Installation numbers, when used to reference an item, should be prefixed with the appropriate WAC number, since installa-

tion numbers are repeated from WAC to WAC. For example, there is an NPIC target number 0290-1 and an NPIC target number 0380-1. In each instance, the NPIC installation number is 1, but the installations appear on different WAC charts.

PHOTO REFERENCE DATA

The photo reference data indicates the frame(s) on which the installation appears.

CONDITIONS AFFECTING PHOTOGRAPHY

Following the photo reference data, symbols indicate conditions which affect the appearance of the installation on the photography. The symbols are: C (clear); SC (scattered clouds); HC (heavy clouds); SC-HC (scattered-to-heavy clouds); H (haze); CS (cloud shadow); SD (semidarkness); O (obliquity); S (snow); and PQ (poor image quality).
